### SMS to Speak at HP Tech Forum in Las Vegas

Mark Murawski, Director of Professional Services, is a scheduled speaker at this year's HP Tech Forum in Las Vegas.

"My session is titled **Non-Eventful Data Center Relocations – It's more than just a box move,**" states Murawski from his Arizona office. "I'm excited to be selected because this is such a critical topic. Many companies are reaching their data center capacity limits or need an alternate site for high-availability and DR but they have limited experience planning and executing a large relocation project. This session will help them think about all of the aspects of a major relocation."

The session is scheduled for June 19<sup>th</sup> and is for IT professionals unfamiliar with the **pain** of planning and moving systems to new locations. Most find that developing the application inventory and dependency matrix can be overwhelming. This session will teach the key success factors and pitfalls of major relocation projects and emphasize the importance of pre-planning and mock run-throughs. Murawski will share his "how to do it right" experience to make your next relocation simply non-eventful.

"The bottom line is that we need to think through all the aspects of the move beforehand. Most relocation problems are solved in the planning stages. SMS offers a unique relocation service because we do everything with our own system engineers," states Murawski.

You can reach Mark Murawski at [mmurawski@sysmaint.com](mailto:mmurawski@sysmaint.com) for further information about your data center relocation.

#### About SMS

SMS delivers Responsive, High Quality, Cost-Effective Systems Maintenance Services throughout the US. Our maintenance business and the extensive systems knowledge needed to deliver that support, positions SMS as a perfect choice for most equipment related activities in the data center.

#### SMS and Data Center Relocations

SMS uses its own Field Engineers to deliver data center relocations. Most engineers are resident in the area they support and full time employees with extensive certifications in both software and hardware. Although educational backgrounds may vary, most engineers are electrical engineers.

#### SMS and our Local Labs

Each SMS location has a fully developed laboratory environment that support our customers HotSpares<sup>SM</sup> environment and All-Inclusive<sup>SM</sup> Service Level Agreements.

**Data Center Relocations are more than just moving boxes.**

#### SMS Company Snapshot

- Founded in 1981
- 10% CAGR since 1999
- Profitable growth since inception.
- 27 Service Centers in 2006.
- The Leader in Independent Maintenance.

#### Systems Supported

- Sun Microsystems
- Hewlett-Packard Systems
- Hewlett-Packard Classic Digital
- Hewlett-Packard Classic Compaq
- IBM P-series (RS-6000)
- IBM X Series
- Dell Systems
- Cisco Systems
